Please read and answer all of the questions below (refer to the Window Treatment Rebate Guidelines)

Manufacturer of film or screen and SHGC or % blockage? _____ / _____

Total square footage covered and direction of the windows? _____ / _____

Installer of window treatment? _____

Date of purchase and installation? _____ / _____

Labor warranty / Material warranty? _____ / _____

Please read and Initial above each line

____ I understand that to qualify for a rebate, the solar film and/or solar screen must be purchased and installed between August 1, 2013 and July 31, 2014. NBU must receive this completed application and a copy of the receipt(s) and documentation for the window treatment that verifies the required specifications and the date of purchase and installation within 30 days of transaction and no later than July 31, 2014.

____ I agree to allow NBU to perform a visual inspection, if necessary.

____ I understand that NBU is not responsible for damage to persons or property from the installation of window treatments by the customer's agent.

____ I understand NBU reserves the right to deny any rebate request if the applicant does not conform to the program qualifications, procedures and specifications, with no exceptions. **Funding for this program is limited and will be awarded on a first come, first serve basis.** This program may be terminated at any time as deemed necessary by NBU.

Guidelines for the NBU Solar Screen/Solar Film Rebate Program

- Applicant must have an active electric service account (commercial or residential) with NBU at the time of purchase and installation.
- Rebates will be paid on the actual square footage (minimum 25 sq. ft.) of existing (not new construction) glass that encloses a mechanically air conditioned permanent dwelling and that face east, southeast, south, southwest, west or northwest directions only. North or northeast facing windows do not qualify. Correct direction facing skylights also qualify. Treated windows must have three hours direct sunlight per day and may not already be covered with solar film or solar screens. Glass panes must not be reflective, wired, textured, obscured or patterned and must be single or dual pane glass only.
- The window treatment must be permanently affixed to the glass (solar films) or window frame (solar screens). Solar film must have an integral adhesive, not a cling film and a uniform appearance with no streaks, banding, pinholes, jagged edges, scratches or bubbles. Solar film must carry a five year warranty against fading, cracking, crazing or adhesive failure and must provide for replacement film and labor.
- The SHGC (solar heat gain coefficient) must be less than .41 (<.41 SHGC) for solar films and a minimum 80% heat gain blockage for solar screens.
- Manufacturer's installation procedures and local city codes will be followed. Solar Screen or film can either be self-installed or installed by a company in the business of selling and installing solar film or solar screens.
- The residential or commercial rebate is \$0.75 / sq.ft. and cannot exceed 50% of the total job cost, including materials, labor and tax. Maximum rebate is limited to \$300.00.
- Customer or contractors receipt must include documentation for all requirements as stated in these guidelines. Receipt(s) must be accompanied by the manufacturer's product identification stating the rated SHGC or heat blockage %, warranty statement and documentation detailing total area and direction of treatment installed. Materials must be minimally warranted for five years and contractor labor for one year.
- Purchase and installation must be between August 1, 2013 and July 31, 2014 and application received by NBU by July 31, 2014.
- NBU reserves the right to inspect the installation prior to approval of the rebate. NBU is not responsible for damage to persons or property from the installation of window treatments by the customer's agent.
- Funding for this rebate program is limited and will be awarded on a **first come, first serve basis**. This program may be terminated at any time as deemed necessary by NBU.
